DETAILED ACTION

Election/Restrictions

1. Applicant's election with traverse of Species A, D, F, H, and M in Paper No. 6 is acknowledged. The traversal is on the ground(s) that the generic claims are considered to be allowable and the election requirement will not reduce the workload of the USPTO. This is not found persuasive because the claims have not been indicated as allowable by the USPTO and the species represent independent inventions. The following claims read on all the elected species: 1, 2, 3, 6, 7, 9, 11, 12, 14, 15, 19, 20, 21, 24, 25, 28, and 29. Claims 4, 5, 8, 10, 13, 16, 17, 18, 22, 23, 26, and 27 have been withdrawn from consideration at this time.

The requirement is still deemed proper and is therefore made FINAL.

Specification

2. The disclosure is objected to because of the following informalities: "130" on page 6, line 10, apparently should be "30".

Appropriate correction is required.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-3, 6-7, 11-12, 14-15, 19-20, 24-25, and 28-29 are rejected under 35 U.S.C. 102(b) as being anticipated by Maruyama et al. Maruyama et al. discloses a sheet-wise binding system that includes a sheet transport path (401), a movable (405x) punch (406a, 407a),

Art Unit: 3651

a stacking system (62), a stapler binding system (52), and a controller (CPU) that controls the sheet transport to locate and punch a finger index at a varying depth (see col. 7, lines 24-25).

Regarding claim 3, a claim containing a "recitation with respect to the manner in which a claimed apparatus is intended to be employed does not differentiate the claimed apparatus from a prior art apparatus" if the prior art apparatus teaches all the structural limitations of the claim.

See M.P.E.P. § 2114. Since, the position of the edge feature is a recitation of how the apparatus is intended to be employed and Maruyama discloses all the structural limitations of the claim, Maruyama anticipates claim 3.

5. Claims 19-21, 24-25, and 28 are rejected under 35 U.S.C. 102(b) as being anticipated by Scholta (WO 00/40425). Scholta discloses a method of binding sheets that includes delivering a plurality of sheets (16a) to a punch (24), punching the sheets to form an edge feature on the leading and trailing edges (see Fig. 4), stacking the sheets (15), and binding the sheets (15).

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
